About Me

From the moment I produced my first “Hello World” in the console of my first application, I knew I was hooked into the world of web development. But web development has never been “just a job” for me, it’s an engaging challenge to continually learn and improve my skills. What started with a simple “Hello World” has become a full-fledged passion that only gets more exciting as the years go by.

Below you’ll find projects that showcase my skills and general background in web development.

Experience

CloneBnb (<http://bit.ly/2KAheTJ>)

Full-stack web application inspired by Airbnb. It consists of a React/Redux frontend and a node & express backend. Utilizes Amazon S3 image uploading, Google Maps API integration, and session storage via Express Session.

TrivaApp (<http://bit.ly/2WTYvsO>)

A trivia game with React and using questions from open trivia DB. It consists of 10 random multiple choice questions. Each correct answer is worth 1 point, if you score high enough, you can make the leaderboard.

FaceFinder (<http://bit.ly/2WtgG9p>)

A full-stack web app made using React, Javascript, Node.js, and Postgresql. Capable of performing face recognition on photos using the Clarifai API. The app also features a user system with local authentication secured by hashed passwords.

ReactWeatherApp(<http://bit.ly/2QX7gg1>)

A Simple weather app built with React and the Open Weather API. Upon entering a city in the search bar, the user gets various weather statistics such as a weekly forecast, current temperature, humidity, pressure, and wind speed.

Technical Skills

- Expertise in using Frontend technologies such as HTML5, CSS3, Bootstrap4, SASS, JavaScript.
- Strong Experience in dealing with CSS Animations, Backgrounds, Layouts, Positioning, Text, Border, Padding and CSS Box Model.
- Hands on experience in using different JavaScript libraries such as React.js, Redux, Express.js, and Node.js.
- Experience in using Node.js and Express.js for making calls (GET, POST, PUT, DELETE) for triggering or fetching data from Restful API's.
- Experienced in Relational database such as Postgresql.
- Ability to share and integrate knowledge across workgroups.
- Good Web Application debugging skills using Chrome Developer Tools.
